## **Executive Summary**

The Utah Water Quality Board (the Board) administers financial assistance programs through the Division of Water Quality including the Clean Water State Revolving Fund, the Utah Wastewater Loan Fund, and the Hardship Grant Funds. The Board is comprised of nine members who are appointed by the Governor. The Board's primary responsibilities in administering financial assistance funds include developing administrative rules for program implementation, authorizing loan and hardship grant/principal forgiveness amounts, and determining interest rates and loan terms.

The Division of Water Quality (DWQ) serves as staff for the Board and manages the day-to-day operations of the financial assistance programs. Those responsibilities include administering loans, providing construction assistance, and managing fund transactions. DWQ coordinates their efforts with the Department of Environmental Quality - Office of Support Services, the Utah Division of Finance, the Utah Attorney General's Office, and the State Treasurer's Office in order to meet all federal and state requirements.

Both direct and indirect costs are incurred by DWQ for the administration of the financial assistance programs. Those costs are funded with program revenues, which include Clean Water State Revolving Fund (SRF) administrative dollars and loan origination fees. Department of Environmental Quality employees charge time for eligible administrative work on the SRF program. Those employees are covered by the State of Utah personnel benefits plan. Indirect costs for general state expenses are also charged through a cost allocation plan.

Key program results at the end of Fiscal Year 2015 were:

- One hundred and fifteen (115) loans have been closed since August 1988; one hundred and nine (109) of those projects having completed construction.
- As of June 30, 2015, the total loans receivable amount was \$170,898,701.
- During FY15, a total of \$5,501,619 was drawn from the federal line of credit (LOC) for projects under construction.
- SRF activity in FY15 included total loan disbursements of \$7,587,000; principal loan repayments of \$11,503,559; and, loan interest and penalty payments of \$632,975.
- The Federal Hardship fund activity included hardship grant disbursements of \$5,763,762; advance disbursements of \$175,300; advance and loan repayments of \$1,504,195; and, hardship assessment fee and penalty payments of \$1,735,761.
- Construction was completed on two SRF loan projects: Salt Lake City wastewater treatment plant and the Echo Sewer SSD large underground system. Construction began on three SRF loan projects: Ephraim City, Eureka City, and Francis City.

## **Program History**

Utah's Clean Water SRF was established pursuant to Title VI of the Federal Clean Water Act of 1987. The SRF provides low interest rate loans for the funding of water quality and wastewater

infrastructure projects in Utah. The State of Utah – Department of Environmental Quality receives Capitalization Grants from the EPA and provides 20% in state matching funds for obligated grants. The SRF receives revenue from principal loan repayments, interest payments, and interest earned on the investment fund. Expenses for projects under construction are then disbursed from the SRF.

DWQ also operates a state loan program, which provides an alternative source of funding for certain water quality projects, providing additional flexibility for project development without some of the funding conditions or restrictions that accompany the SRF funds. State matching funds for the SRF are generated from this state loan program.

With approval from the Environmental Protection Agency (EPA), the State of Utah established a Federal Hardship Grant Program in 1993. This grant program is funded through hardship assessment fees charged in lieu of interest on SRF loans. The hardship grant assessment fees are deposited into a Federal Hardship Grant Fund, which is separate from the SRF. These monies are used to provide grants to communities that are otherwise financially unable to implement clean water projects with support from the loan programs.

### **Mission Statement**

The mission of the Division of Water Quality is to protect, maintain, and enhance the quality of Utah's surface and underground waters for appropriate beneficial uses; and protect the public health through eliminating and preventing water related health hazards which can occur as a result of improper disposal of human, animal or industrial wastes while giving reasonable consideration to the economic impact.

### **Program Goals**

Projects in the state that preserve and protect water quality are considered for financial assistance. Funded projects may include construction of publicly owned treatment works (POTWs), nonpoint source projects, stormwater projects, energy and water efficiency initiatives, construction of publicly or privately owned decentralized systems, and technical assistance.

### **Long-Term Program Goals**

1. Provide a permanent funding source for water quality construction projects that supplements a community's own resources and/or other funding sources.
  - All projects receiving loans through the SRF are required to make an annual repayment of principal beginning one year after project construction is complete. Since its inception, the fund balance has steadily increased. Cash flow projections indicate that the fund will continue to generate a repayment stream for the funding of future projects.
2. Distribute SRF funds to projects with the highest water quality and infrastructure needs by evaluating and prioritizing proposed projects throughout the state.
  - All projects receiving funding through the SRF meet a critical need as defined by the Utah State Project Priority System.

3. Support EPA's Sustainability Policy by balancing a community's economic and water quality needs with the perpetuity of the SRF program.
  - All projects receiving funding through the SRF are evaluated for their ability to solve critical public health and water quality needs while recognizing community economic conditions. Projects are funded in a manner that will be protective of the environment, affordable to the community, and consistent with EPA's Sustainability Policy.
  - The DWQ conducts financial feasibility reviews of all proposed project that are based on engineering studies and facility plans conducted by SRF applicants prior to requesting Water Quality Board authorization to obligate SRF funds. This review includes an analysis of the value and priority of each project and of the construction loan amount and rate of interest that should be applied. The result of these reviews is to ensure that all funded projects will use loan funds effectively and that the applicants can reasonably afford to repay their loans while properly maintaining constructed systems and meeting their water quality objectives. Loans will not be authorized unless applicants are capable of repaying them.
  - The Hardship Grant Program was created specifically to provide supplemental funding for important water quality projects where the applicants are not able to secure sufficient loan funds due to financial hardship and other constraints.
4. Assist communities with all phases of a project, including sufficient planning, project design, environmental work, and construction.
  - The Water Quality Board assists communities to address the need for adequate wastewater infrastructure. The Board recognizes that wastewater facilities must meet community and water quality needs throughout their design life and that these facilities must be flexible to accommodate growth and changing requirements within that period. Therefore, when helping communities provide wastewater infrastructure for existing and future users, the Board supports and requires strong community planning efforts to establish financial sustainability, coordinated growth, and cost effective development and provision of wastewater services.

#### Short-Term Program Goals

1. Present eligible projects to the Water Quality Board for authorization by increasing the profile of the SRF program as a potential funding source and by assisting communities through the application and award process.
  - Engineering Section staff works closely with communities to ensure facility planning satisfies water quality needs and program requirements. Staff supports applicants during application preparation to simplify this process, reduce paperwork, and minimize delays and red tape.

2. Collaborate with other agencies (i.e. Utah Permanent Community Impact Boards, US Department of Agriculture Rural Development, and US Army Corps of Engineers) in order to sufficiently fund projects.
  - Engineering Section staff assists each community from the beginning stages of application, planning, and design and coordinates funding partnerships, particularly for large projects, with other public and private funding entities.
3. Solicit and fund eligible nonpoint source and stormwater projects.
4. Provide funding, equal to at least ten percent (10%) of the capitalization award for recycled water and water reuse projects.

### **Program Accomplishments**

During FY15, the Board authorized funding for four (4) loan projects, namely Francis City, Helper City, Price River Water Improvement District, and Willard City.

- Francis City was identified as a disadvantaged community and, therefore, the Board authorized a combination of loan and hardship grant funding. The loan is for \$5,500,000 with an interest rate of zero percent (0%) and repayable over twenty-five years. The principal forgiveness/hardship grant is \$2,275,000. The funding will be used to expand the existing wastewater treatment lagoon system.
- Helper City received authorization for a \$2,314,000 loan at zero percent (0%) interest and repayable over 30 years to complete a sewer main replacement project
- Price River Water Improvement District received authorization for a \$600,000 loan at one percent (1%) interest and repayable over twenty years. This funding allowed the District to replace its facilities which were either lost or damaged during a flooding event along the Price River.
- Willard City received authorization to refinance its existing loan. Due to a lack of growth in the community, principal payments became unaffordable. The Board restructured the annual principal payments for \$10,740,000 remaining principal at zero percent (0%) interest and repayable over thirty years.

In addition, the Board authorized \$417,600 for planning studies in seven (7) communities; \$1,600,000 for nonpoint source and study activities.

State Revolving Loan and Utah Wastewater Loan funds are not fully obligated until bonds are purchased by the Board; therefore, funds for construction are unavailable to communities until loan closing occurs. During Fiscal Year 2015, the Board held closings for three (3) projects: Ephraim City, Eureka City, and Francis City.

- Ephraim City closed on a \$2,553,000 loan at two percent (2%) interest and repayable over twenty years. Ephraim City used its SRF loan funding in conjunction with a Community Development Block Grant and a local contribution for construction of its wastewater lagoon improvements.
- Eureka City closed on a \$1,300,000 loan at zero percent (0%) interest and repayable over thirty years as well as a \$1,146,000 principal forgiveness/hardship grant agreement.

The rehabilitation of its existing wastewater collection and treatment system is an example of multiple funding agencies coordinating to fund a project. In addition to SRF monies, Eureka City received funding from the Community Impact Board (CIB), the U.S. Department of Agriculture (USDA) Rural Development program, and the U.S. Army Corp of Engineers.

- Francis City closed on a \$5,500,000 loan at zero percent (0%) interest and repayable over twenty-five years as well as a \$2,200,000 principal forgiveness/hardship grant. SRF monies are for the upsizing of the City’s existing wastewater treatment lagoon system.

All funds committed through the SRF are categorized by the EPA “Needs Category.” Figure 1 shows the total amount of SRF dollars committed by Needs Category.

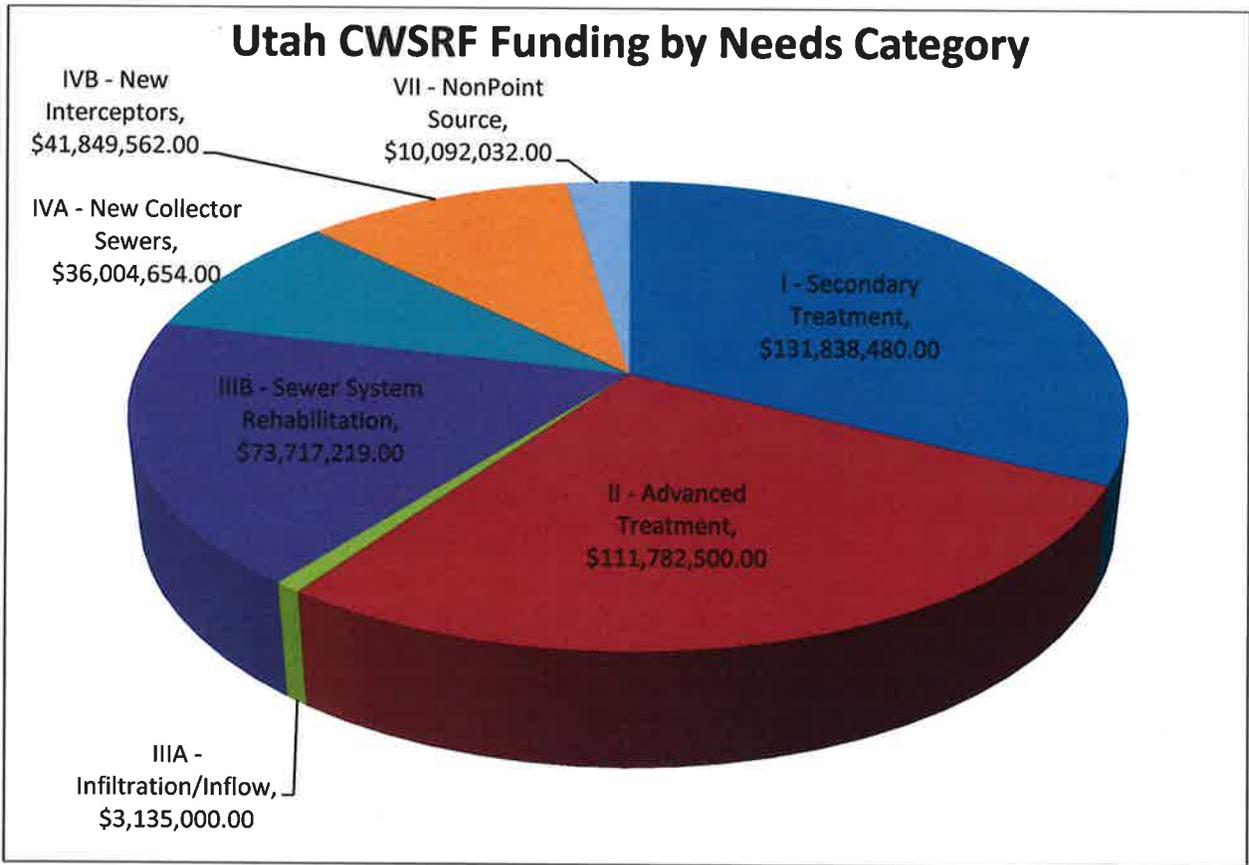

Figure 1

Loan and hardship grant monies are disbursed from financial assistance program accounts for eligible projects costs including study, planning, design, and construction, state match, and program administration. A total of \$20,224,767 was disbursed from restricted accounts during Fiscal Year 2015 and is summarized below.

- *SRF Disbursements* - A total of \$7,587,000 was disbursed for SRF projects under construction during FY15. Figure 2 shows the annual dollar amount of disbursements made from the SRF. Since 1989, total disbursements are \$404,695,447.

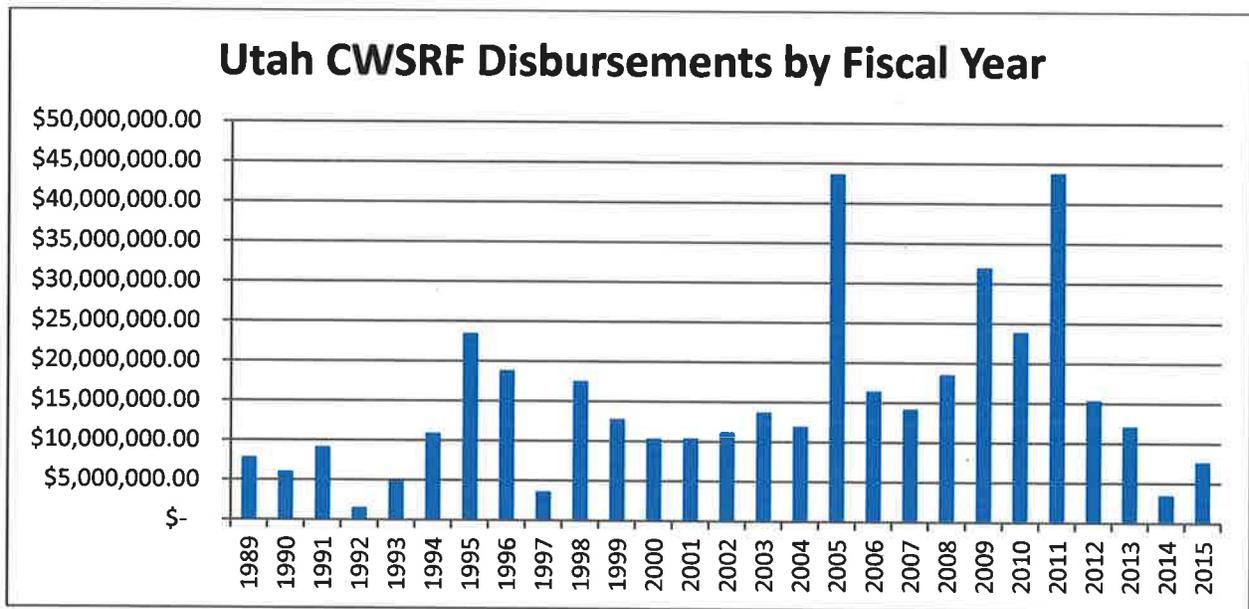

Figure 2

- *UWLF Disbursements* - A total of \$6,503,745 was disbursed including \$1,472,400 in state matching funds, \$3,661,000 for projects under construction, and \$1,370,345 for Division administrative costs.
- *Hardship Grant Funds Disbursements* - The Board may use hardship grant monies to award planning advances, design advances, planning grants, construction hardship grants, and non-point source grants. In FY15, \$6,134,022 was disbursed from the Hardship Grant Funds. Figure 3 demonstrates the total dollar amount and percentage of disbursements made by project type.

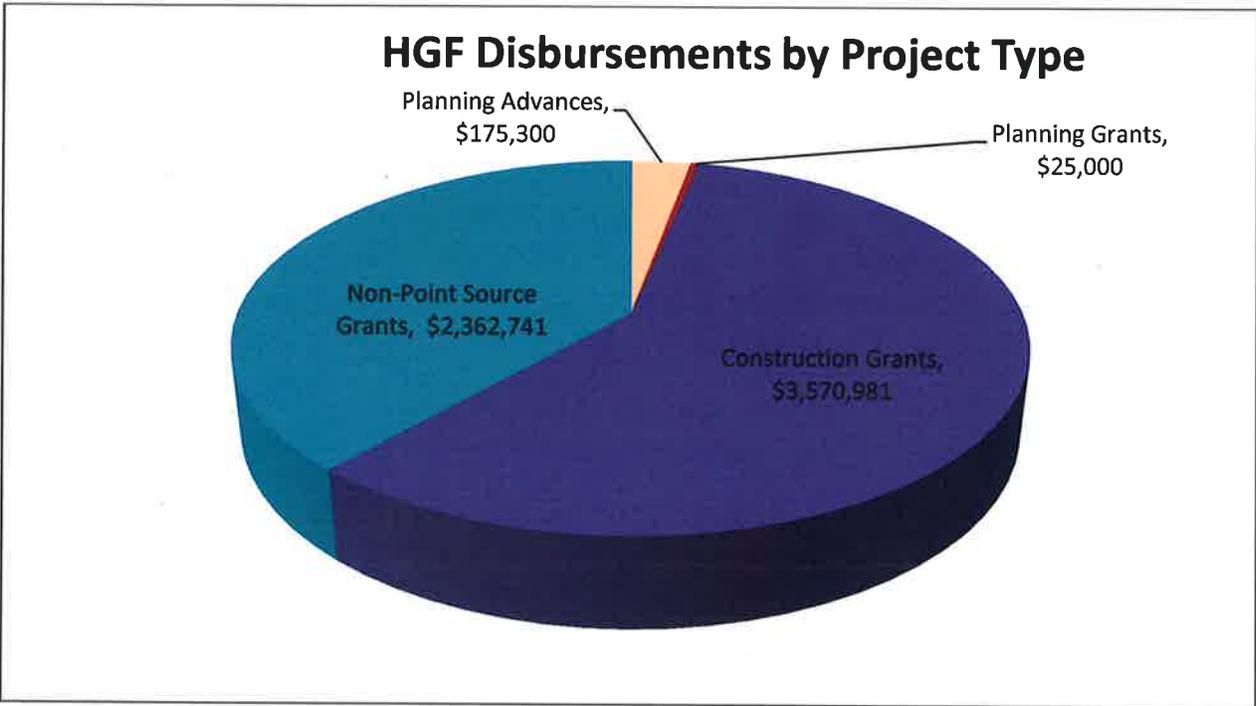

Figure 3

Three construction projects were completed during the year ended June 30, 2015.

- Echo Sewer SSD – Large Underground Wastewater Disposal System
- Salt Lake City – Digester Cover Replacement
- Washington Terrace – Backyard Sewer Project

For the year ended June 30, 2015, there were a total of 115 loans funded through the Utah CWSRF program with 109 of those projects having completed construction. For further details of CWSRF loans, please see Table 1.

**Operating Agreement Conditions**

The State of Utah has twenty-four conditions in the SRF Operating Agreement with the EPA that set forth program, management, and financial policies and procedures to be implemented. The first twelve conditions have been met and require no further description:

1. Agreement to Accept Payments
2. State Laws and Procedures
3. State Accounting and Auditing Procedures
4. Recipient Accounting and Auditing Procedures
5. Use of the federal Letter of Credit (LOC)
6. Repayments
7. Annual Audit
8. Annual Report

9. Annual Review
10. Anti-lobbying
11. Drug Free Workplace
12. Rural Area Business Enterprise Development Plan

The remaining twelve conditions in the Operating Agreement have also been met and are described below:

13. Provide State Match - State match funds are derived from sales tax dollars that are deposited into the Utah Wastewater Loan Fund. As prescribed in the Intended Use Plan, the Division of Water Quality uses the total amount of state match required toward eligible project costs before making draws from the EPA Capitalization Grant.
14. Repayment Begins within One Year of Construction End – Principal and interest repayments of loans made through the SRF begin within one year of construction completion. This time allows revenue accumulation for one annual loan repayment.
15. Extended Term Financing – Utah ensures that the long-term revolving nature of the fund is protected. Based on Clean Water NIMS data, the three-year rolling average of annual loan commitments for 2013, 2014, and 2015 is \$10,117,000, which is below the established baseline of \$10,770,155.
16. Expeditious and Timely Expenditure - Utah has disbursed all cash draws in a timely and expeditious manner. Construction has begun on all SRF projects within a short period after loans are closed. For details on federal cash draw details, please see Table 2 on page 23.
17. First Use for Enforceable Requirements - Prior to receiving the Capitalization Grant, Utah had met the requirements of Section 1382(b) (5) of the Clean Water Act. This section requires that all Capitalization Grant funds be used in a manner that assures maintenance of progress toward compliance with enforceable deadlines, goals, and requirements of the Clean Water Act.
18. Eligible Activities of the Fund - All projects that have received SRF loans have expended loan proceeds for eligible costs.
19. Compliance with Title II Requirements - In accordance with Section 1382 (b) (6) of the Clean Water Act, the SRF is required to meet sixteen specific Title II “equivalency” requirements for wastewater treatment projects under Section 212 which have been constructed, in whole or part, before October 1, 1994, with funds “directly made available by the Capitalization Grant.” The State has met equivalency requirements up to October 1, 1994 and documented that compliance in previous annual reports. Since there was no requirement under this statute beyond the October 1, 1994 date, there has been no additional reporting for equivalency in this report.
20. DBE Requirements - The State negotiated fair share utilization goals with Region VIII for participation on activities financed by the SRF. During the state fiscal year, the SRF

program has met or exceeded the minimum Disadvantaged Business Enterprise (DBE) utilization program requirements. Construction projects have either implemented fair share utilization goals for DBE participation or have demonstrated that a good faith effort was made to provide opportunity for qualified DBE involvement.

21. Other Federal Authorities - The State and all recipients of SRF funds, which were made available directly by the Capitalization Grant, have complied with applicable federal authorities. Recipients of SRF assistance agreed to this as a condition of the bond agreement between the loan recipient and the State.
22. State Environmental Review Process - During the fiscal year, the State was actively involved in assisting potential SRF projects with planning. Environmental impacts are being carefully considered with each plan. No loans are closed with a community until a Categorical Exclusion, Finding of No Significant Impact, or Environmental Impact Statement is issued.
23. Cash Draw Procedures - Table 2 of this report includes the amount of funds drawn from the federal Letter of Credit (LOC) and from the state match for loan projects and administration during the fiscal year.
24. Outlay Projections - The FY15 Intended Use Plan (IUP) projected draws for loans from the federal LOC equal to \$6,767,113. During SFY 2015 a total of \$5,779,363 was actually drawn, which is approximately 85% of the projected amount.

**Additional Subsidization**

Not less than 20% but not more than 30% of the funds made available through the 2013 and 2014 Clean Water SRF capitalization grants must be used to provide additional subsidy to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants. However, this requirement only applies to the portion of the federal appropriation that exceeds \$1 Billion. The minimum and maximum amounts that may be used toward the additional subsidization requirement are:

	<u>Minimum Amount</u>	<u>Maximum Amount</u>
FY 2013 Capitalization Grant	\$330,013	\$495,019
FY 2014 Capitalization Grant	\$400,623	\$600,934

Utah has met the FY13 requirement by providing a total of \$495,019 in principal forgiveness to two (2) projects: Echo Sewer SSD (\$251,000) and Eureka City (\$244,019).

Utah has not yet met the minimum requirement for FY14. However, Francis City has been identified as a disadvantaged community and will draw upon principal forgiveness monies once the community's loan has been expended.

The additional subsidization requirement for the 2015 Clean Water SRF capitalization grant does not obligate the State to a minimum requirement. However, not more than 30% of the award, which is \$2,197,200, may be used in the form of forgiveness of principal, negative interest loans, or grants. The State has not begun expending its FY15 award, but will provide information on any additional subsidization provided in subsequent Intended Use Plans and Annual Reports.

### **Green Project Reserve**

To the extent that there are sufficient eligible projects, not less than 10% of the funds made available through the 2013, 2014, and 2015 Clean Water SRF capitalization grants shall be used for projects to address green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities. The minimum amounts to be used toward the green project reserve requirement are:

	<u>Amount</u>
FY 2013 Capitalization Grant	\$700,600
FY 2014 Capitalization Grant	\$736,200
FY 2015 Capitalization Grant	\$737,300

The State of Utah has met the FY13 green project reserve requirement as it has awarded a total of \$700,600 to two (2) projects: Echo Sewer SSD (and \$231,600) and Ephraim City (\$231,600).

Utah has not yet applied any project funding toward the FY14 or FY15 green project reserve requirement. Potential projects will be identified in subsequent Intended Use Plans and Annual Reports.

### **Current Program Status**

Since its inception, the State Revolving Fund has been steadily increasing and has grown into a permanent source of financial assistance for the construction of water quality projects throughout the State of Utah.

Each year, there are water quality projects in Utah that do not receive funding directly from the SRF. Utah encourages community self-reliance through prudent planning and cooperative efforts to utilize other sources of available financial assistance.

Many of the larger wastewater treatment facilities located in high population areas of the State are able to afford construction financing without utilization of the State Revolving Fund. Medium-sized communities rely heavily on the SRF to provide additional assistance, making wastewater treatment affordable to their citizens. To achieve efficient and affordable public health and water quality solutions, communities with small populations use the USDA Rural Development and Utah Wastewater Project Assistance Program financing for loans and grants for their wastewater projects. The Utah Community Impact Board funding is used by communities located within impacted (mineral extracting) counties.

**UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY  
DIVISION OF WATER QUALITY – STATE REVOLVING FUND  
NOTES TO FINANCIAL STATEMENTS**

**June 30, 2015**  
Unaudited

**NOTE 1 – DEFINITION OF REPORTING ENTITY**

The Utah Department of Environmental Quality, Division of Water Quality - State Revolving Fund (SRF or Fund) program was established pursuant to federal action in order to provide low interest rate loans to public wastewater systems for preservation and protection projects that meet eligibility requirements. The United States Environmental Protection Agency (EPA) allows up to four percent (4%) of the Capitalization Grant award to be used for administrative costs incurred by the program. Funding from the 4% administrative portion of the capitalization grant and from the collection of loan origination fees allows for the supervision of the SRF program as well as for oversight of individual projects.

The Water Quality Board (the Board) is comprised of nine members appointed by the Governor. The Board develops policies and procedures for program implementation and authorizes loans under the SRF program. The Utah Department of Environmental Quality (DEQ) and the Board jointly manage the SRF program. DEQ - Division of Water Quality reviews loan applications for eligibility, prioritizes eligible projects, monitors loan disbursements and repayments, and conducts project inspections. Through the Utah Code, the legislature has given the Board rule making authority that meets federal law requirements. The Board reviews each loan applicant to determine its ability to repay the loan, its readiness to proceed with the project, and its ability to complete the project.

The SRF program receives assistance and support from the Department of Environmental Quality - Office of Support Services, the Department of Administrative Services - Division of Finance, the Utah Attorney General's Office, and the State Treasurer's Office. Salaries and benefits of employees, as well as indirect costs based on direct salary costs, are accumulated in the state's general fund and charged to the SRF based on actual time spent on SRF activities. Employees who charge time to the SRF are covered by the State of Utah personnel benefits plan. The SRF program is funded by a series of capitalization grant awards from EPA. Grant conditions require States to provide twenty percent (20%) matching funds to the federal Capitalization Grant.

The Fund follows the Governmental Accounting Standards Board (GASB) accounting pronouncements which provide guidance for determining which governmental activities, organizations and functions should be included within the financial reporting entity. GASB pronouncements set forth the financial accountability of a governmental organization's elected governing body as the basic criterion for including a possible component governmental organization in a primary government's legal entity. Financial accountability includes, but is not limited to, appointment of a voting majority of the organization's governing body, ability to impose its will on the organization, a potential for the organization to provide specific financial benefits or burdens and fiscal dependency.

**UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY  
DIVISION OF WATER QUALITY – STATE REVOLVING FUND  
NOTES TO FINANCIAL STATEMENTS**

**June 30, 2015**  
Unaudited

The SRF program and activities are included in the Utah Comprehensive Annual Financial Report (CAFR) as part of the Proprietary Funds (Water Loan Programs). The SRF assets, liabilities, and net assets are combined with other state programs and are not separately identifiable.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The accounting policies of the Fund conform to generally accepted accounting principles as applicable to a governmental unit accounted for as a proprietary enterprise fund. The enterprise fund is used since the Fund's powers are related to those operated in a manner similar to a for profit business where an increase in net assets is an appropriate determination of accountability.

**Basis of Accounting**

The SRF financial statements are presented as an enterprise fund. Revenues are recorded when earned and expenses are recorded when the related liability is incurred, regardless of the timing of the cash flows. All assets and liabilities associated with the operation of the SRF are included in the statement of net assets. The SRF has elected to follow the accounting pronouncements of the Governmental Accounting Standards Board (GASB), as well as statements issued by the Financial Accounting Standards Board (FASB) on or before November 30, 1989, unless the pronouncements conflict with or contradict GASB pronouncements.

**Cash and Cash Equivalents**

In accordance with the Money Management Act, Section 51-7 of the Utah Code, the State Treasurer administers cash and manages investments in the State. The Money Management Act specifies the investments that may be made, which are only high-grade securities. Investments include variable rate corporate notes and obligations of U.S. government agencies that base their rates on standard quoted money market indexes that have a direct correlation to the federal funds rate. Therefore, there is very little market risk because the investments follow the normal swings of interest rates. Cash equivalents are generally considered short-term highly liquid investments with maturity of three months or less from the purchase date.

All funds deposited with the Treasurer are considered to be cash or cash equivalents regardless of the actual maturities of the underlying investments in the statement of cash flows. Investments in debt and equity securities are reported at fair value in the statement of net assets, and all investment income, including changes in the fair value, are reported in the statement of revenue, expenses, and changes in fund net assets.

**Operating Revenues and Expenses**

The SRF distinguishes between operating revenues and expenses and non-operating items in the statements of revenues, expenses and changes in net assets. Operating revenues and expenses generally result from carrying out the purpose of the SRF, which is to provide low interest loans to communities and provide assistance for prevention programs and administration. Operating revenues consist of loan interest repayments from borrowers. Operating expenses include

**UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY  
DIVISION OF WATER QUALITY – STATE REVOLVING FUND  
NOTES TO FINANCIAL STATEMENTS**

**June 30, 2015  
Unaudited**

allocated direct salary costs and benefits, allocated indirect costs and allowance for bad debt. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses or capital contributions.

The EPA capitalization grant and the associated State match are recorded as capital contributions, except for principal forgiveness which is reported as non-operating revenue, and the 4% administrative match which is reflected as operating revenue.

When both restricted and unrestricted resources are available for use, it is the Fund's policy to follow the State of Utah's policy as defined in the State of Utah Comprehensive Annual Financial Report.

**Hardship Assessments**

The Board has the option to charge a hardship assessment in lieu of interest on loans made from the repayment stream (2<sup>nd</sup> Round). Hardship assessments are calculated and paid in the same manner as interest. The restriction for the use of hardship assessments differs from the restriction for the use of interest. Hardship assessments can be used for purposes other than loans, including grants to disadvantaged communities.

**Loan Origination Fee**

The Water Quality Board may charge a Loan Origination Fee up to 1% of the principal loan amount. This fee may be used for any allocable activities under the Act and administration of the loan program.

**Budgets**

The SRF, as an enterprise fund of the State, does not require appropriation, and therefore, the SRF is not included in Utah's annual appropriation.

**Use of Estimates in Preparing Financial Statements**

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues, expenses, gains, losses and other changes during the reporting period. Actual results could differ from those estimates.

**Loans Receivable**

Loans are funded by capitalization grants from the EPA, State matching funds, loan repayments and interest earnings. Interest is calculated from the date that funds are advanced. After the final disbursement has been made, the loan agreement is adjusted for the actual amounts disbursed. Loans are amortized for up to 30 years. Loan repayments must begin within one year of construction completion and are made on an annual basis. For projects receiving principal

NOTES TO FINANCIAL STATEMENTS**

**June 30, 2015**

Unaudited

forgiveness grants, monies are advanced and forgiven as each disbursement occurs. Loan agreements require repayment of the forgiven loan if all program requirements are not met.

**Allowance for Bad Debts**

The allowance for bad debts is established as losses are estimated to have occurred through a provision for bad debts charged to earnings. Loans receivable are charged against the allowance for bad debts when management believes that the uncollectibility of the principal is probable. The allowance for bad debts was \$0 at June 30, 2015.

**NOTE 3 – CASH AND INVESTMENTS**

All monies of the SRF are deposited with the Utah State Treasurer and are considered cash and cash equivalents. All cash deposited with the State Treasurer is maintained by the Treasurer in various pooled investment funds. The State Treasurer invests the deposited cash, including the cash float, in short term securities and other investments.

The Utah State Treasurer's Office operates the Public Treasurer's Investment Fund (PTIF) investment pool. The PTIF is available for investment of funds administered by any Utah public treasurer. Participation is not required and no minimum balance or minimum/maximum transaction is required. State agencies and funds that are authorized to earn interest also invest in the PTIF as an internal investment pool. No separate report as an external investment pool has been issued for the PTIF. Details of the investments of the PTIF can be obtained from the State Treasurer.

The PTIF is not registered with the SEC as an investment company and is not rated. The PTIF is authorized and regulated by the Utah Money Management Act, (Utah Code Title 51, Chapter 7). The Act establishes the Money Management Council, which oversees the activities of the State Treasurer and the PTIF. The Act lists the investments that are authorized which are high-grade securities which minimizes credit risk except in the most unusual and unforeseen circumstances.

Deposits in the PTIF are not insured or otherwise guaranteed by the State of Utah, and participants share proportionally in any realized gains or losses on investments.

Income, gains and losses, and net of administration fees of the PTIF are allocated to participants on the ratio of the participants' share of the total funds in the PTIF based on the participant's average daily balance. The PTIF allocates income and issues statements on a monthly basis. Twice a year, at June 30 and December 31, the investments are valued at fair value. The SRF has adjusted the PTIF funds to fair value as of June 30, 2015.

Investments in PTIF are not categorized because they are not evidenced by securities that exist in physical or book entry form. Cash and cash equivalents are presented below:

Pooled cash held by State Treasurer	\$ 185,987
Public Treasurer’s Investment Fund	<u>87,670,119</u>
Total cash and cash equivalents	<u>\$87,856,106</u>

**NOTE 4 – LOANS RECEIVABLE**

Loans are made to qualifying entities for projects that meet eligibility criteria. The SRF loan awards are comprised of the following funding sources: (1) the federal EPA Capitalization Grants; (2) State match funds; (3) loan repayments; (4) interest payments; and (5) SRF interest earnings. Projects are funded through the purchase of incremental disbursement bonds and proceeds are deposited into an escrow account based on a quarterly schedule of anticipated costs. Loan interest begins accruing when funds are deposited in the escrow account. Principal repayment must begin no later than one year after the completion of the project. Effective interest rates and hardship assessments on loans vary between 0.0 and 5.0 percent and are generally repaid over 20-30 years. The interest rates on the loans are generally lower than market rates and, in some cases, are non-interest bearing. Loans mature at various intervals and recipients make annual payments.

Loans mature at various intervals through June 30, 2043 and the scheduled principal repayments on loans follows:

<b>LOANS RECEIVABLE</b>	
<b>Year Ending June 30,</b>	<b>Amount</b>
2016	11,025,682
2017	10,927,652

**Loans to Major Local Agencies**

The Fund has made loans to the following major local agencies. The aggregate outstanding loan balances for each of these agencies exceed 5 percent of total loans receivable. The combined outstanding loan balances at June 30, 2015 of these major local agencies represent approximately 38 percent of the total loans receivable and are as follows:

<b>LOANS TO MAJOR LOCAL AGENCIES</b>		
<b>Borrower</b>	<b>Authorized Loan Amount</b>	<b>Outstanding Loan Balance</b>
Central Weber Sewer Improvement	\$10,050,000	\$9,224,568
Hooper City	12,665,000	10,595,000
North Davis County Sewer	21,650,000	17,933,000
Orem City	11,889,000	10,107,000
South Valley Water Reclamation	22,110,000	18,454,000
<b>Total</b>	<b>\$78,364,000</b>	<b>\$66,313,568</b>

**NOTE 5 – DUE TO STATE OF UTAH**

Due to State of Utah balances are an aggregation of amounts due to employees for salaries and benefits and/or vendors and miscellaneous suppliers paid by the state.

**NOTE 6 – CAPITAL CONTRIBUTIONS**

DIVISION OF WATER QUALITY – STATE REVOLVING FUND  
NOTES TO FINANCIAL STATEMENTS**

**June 30, 2015**

Unaudited

The following table summarizes the amount of state contributions made to meet match requirements of the EPA grant:

State match paid as of June 30, 2014	\$38,115,244
State match paid during the year ended June 30, 2015	<u>1,472,400</u>
State match paid as of June 30, 2015	\$39,587,644

**NOTE 7 – RISK MANAGEMENT**

The SRF is included in Utah's Risk Management Fund, which provides insurance in case of loss or claims against the SRF. The State has elected, with a few exceptions, to be self-insured against loss or liability. There have been no significant reductions in insurance coverage from the prior year. In addition, settled claims have not exceeded insurance coverage in the last three fiscal years. Refer to the State's Risk Management disclosure in the June 30, 2014 Comprehensive Annual Financial Reports.

**NOTE 8 – CONTINGENCIES AND SUBSEQUENT EVENTS**

As of June 30, 2015, the total remaining draws for SRF projects with closed loans was \$4,288,981. Draws will be completed during future fiscal years in order to complete wastewater projects in these communities. As of June 30, 2015, the Board had authorized an additional \$70,000,000 in loan funding for one community. However, loan closing had not been completed for the projects.

**NOTE 9 – NET ASSETS**

Governmental Accounting Standards Board Statement No. 34 provides for three components of net assets: invested in capital assets, net of related debt, restricted and unrestricted. As of June 30, 2015, the Fund had no restricted net assets or net assets invested in capital assets, net of related debt. Unrestricted net assets consists of net assets that do not meet the definition of invested in capital assets, net of related debt or restricted. Although the Fund reports unrestricted net assets on the face of the statements of net assets, unrestricted net assets are to be used by the Fund for the payment of obligations incurred by the Fund in carrying out its statutory powers and duties and are to remain in the Fund.
