

Projected 2019 NOx

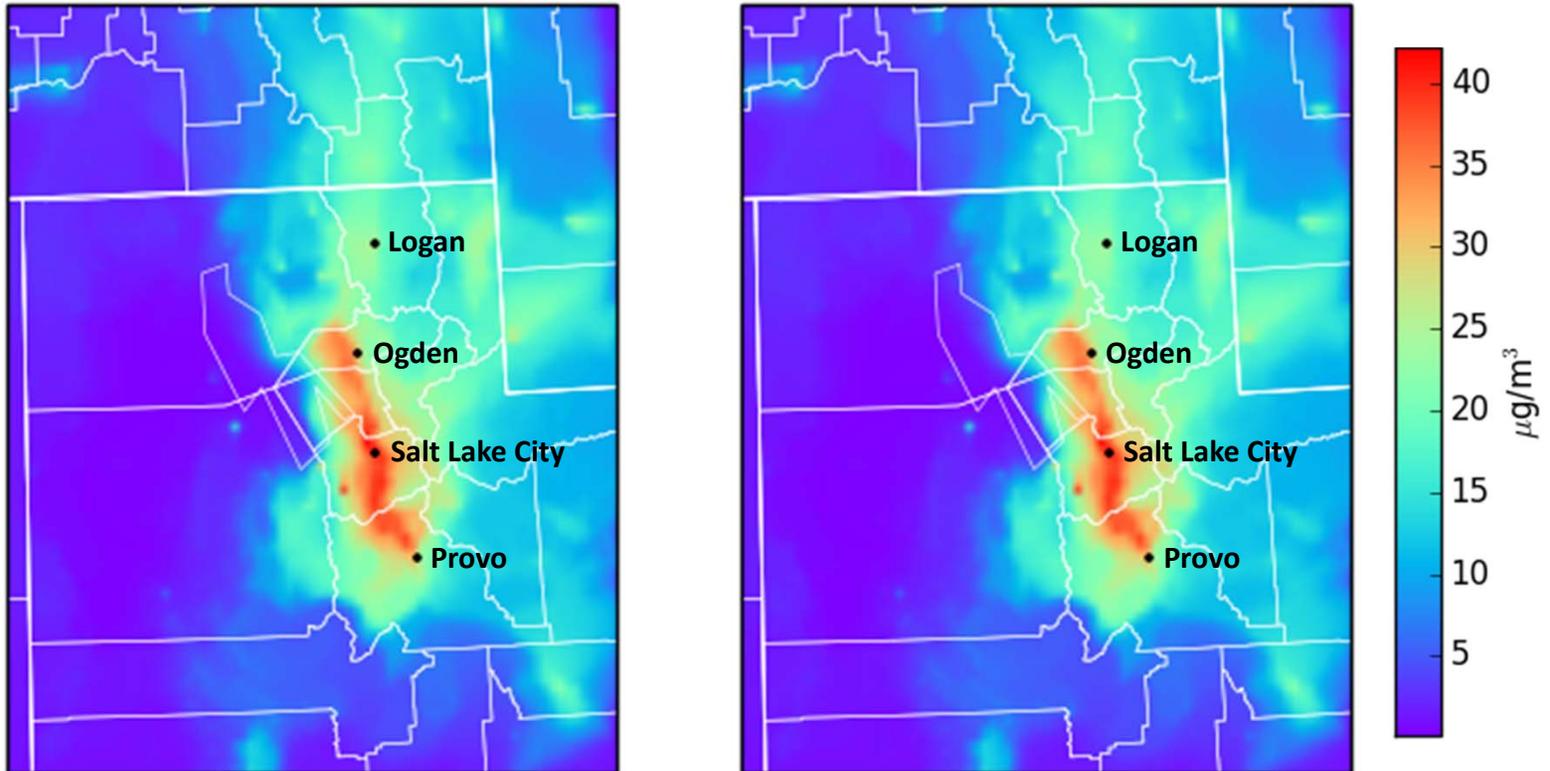

with low NOx water heaters assuming all homes converted over

tons/day of NOx removed per county

(percentage reduced from Area sources):

Salt Lake	Utah	Davis	Weber	Tooele	Cache	Box Elder
2.54	2.04	0.92	0.90	0.44	0.41	0.26
(15%)	(23%)	(18%)	(18%)	(11%)	(17%)	(7%)

Projected 2019 PM_{2.5} Concentrations

*with low NOx water
heaters assuming all
homes converted over*

Modeled PM_{2.5} reduction along Wasatch Front is approximately **0.1 -> 0.4 µg/m³** due to low NOx water heaters.
