2-1-10

Dear Radiation Control,

I totally oppose nuclear waste disposal in Utah. Here are just a few reasons: it becomes more hazardous over time, its dangerous to humans, animals and the environment, and has long term effects. As responsible people we need to consider all of Utah present and future verses immediate greed and selfishness of a few.

Please don't waste Utah.

Sincerely,

Judy M. McCown

P.S. Do the research
