RE: Depleted Uranium Performance Assessment (DUPA)
Request for Extension
Compliance Report, Condition 35
DRC Radioactive Materials License # 2300249

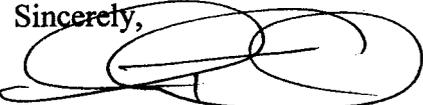

Dear Mr. Rogers:

The Department of Environmental Quality has completed its evaluation of the DUPA extension request dated September 2, 2014. It is agreed that a more thorough evaluation of "Deep Time" issues, coupled with a resolution of the tri-party Memorandum of Agreement (MOA) governing the long-term stewardship of the proposed Federal cell, among other outstanding topics, will be beneficial and add clarity before the start of the public comment period. The request for extension is hereby approved.

However, the Department believes that it is not in the best interest of the public to start the public comment period so close to the holiday season. In order to maximize public participation, the plan is to start the public comment period on January 12, 2015, with public meetings scheduled in Tooele and Salt Lake City during the week of February 2, 2015, and end the public comment period on February 27, 2015.

If you have any questions, please call me at (801) 536-0215.

Sincerely,

Helge Gabert, Project Manager, DU Contract
Division of Solid and Hazardous Waste
