SUBJECT: Radioactive Material Licenses (RML) UT 2300249 and UT 2300478: Approval of the revised Appendix I Organization dated March 9, 2013

Dear Mr. McCandless:

On October 24, 2012, after a reduction in workforce, EnergySolutions (ES) submitted a request (CD12-0275) to revise Appendix I, "Organization," to both RML UT2300249 and RML UT2300278. DRC staff reviewed the request and requested additional information (RFI) on December 14, 2012, but ES underwent a second workforce reduction. Due to the second workforce reduction, on February 4, 2013, ES revised their previous request and provided a revision to the proposed Appendix I, "Organization," (Appendix I) which documented changes to job titles, and demonstrated that the overall responsibilities and qualifications of personnel for each modified job title were not changed. Based on a review of the revised request, DRC staff sent ES another request for additional information (RFI) dated February 21, 2013. ES submitted a third proposed revision (Rev. 24) of Appendix I, dated March 9, 2013 (CD-13-0076).

DRC staff has reviewed all submitted information and all responses to DRC's RFI's. The new organizational structure for ES's Clive facility appears to be satisfactory and adequate to provide sufficient oversight and expertise for meeting occupational and public safety requirements. The changes requested are minor, administrative in nature, and do not include monitoring, sampling, or health and safety issues. Therefore, the Director in consultation with the Attorney General's Office has determined that the changes to both RMLs are minor as defined by R313-17-2 and do not require a public comment period.

Attached are Statements of Basis for each RML outlining the changes made and an explanation of changes that were not approved. Also attached are the redline/strikeout version for each RML and signed copies of each RML. If you have any questions, please contact John Hultquist or Ryan Johnson at (801) 536-4250.

Sincerely

Rusty Lundberg, Director
