

ATTACHMENT II-1-15

AEROSOL CAN PUNCTURING SYSTEM OPERATING PLAN

1. The Permittee may treat pressurized aerosol cans in accordance with the conditions of this Attachment.
2. The aerosol can puncturing system shall consist of a puncturing device and a collection drum.
  - a. The aerosol can puncturing system shall be equipped with a vent filter to trap volatile organic compounds.
3. Aerosol cans punctured and drained through the aerosol can puncturing system may be directly disposed in the Mixed Waste Landfill Cell.
4. The contents of the punctured aerosol cans shall be contained within the collection drum of the aerosol can puncturing system.
  - a. Multiple waste streams may be combined within the collection drum.
    - i. Incompatible materials shall not be combined in the collection drum.
  - b. Unless managed through the thermal desorption treatment process, waste within the collection drum shall be sampled and analyzed prior to further management.
    - i. Based upon the results of the analysis, waste within the collection drum shall be managed in accordance with appropriate sections of this Permit prior to disposal.
  - c. The waste within the collection drum shall be Land Disposal Restriction (LDR) compliant prior to disposal in the Mixed Waste Landfill Cell.
