

Acknowledgements

The selenium program would not have been possible without valuable contributions from the following people and organizations as well as countless others who supported the development and completion of this effort:

Utah Division of Water Quality

Walter Baker
William O. Moellmer
Theron Miller
Ying-Ying Macauley
Jodi Gardberg

North Davis Sewer District

Kevin Cowan

Science Panel

William Moellmer, Utah Division of Water Quality
Theron Miller, Utah Division of Water Quality
Joseph Skorupa, U.S. Fish and Wildlife Service
Theresa Presser, U.S. Geological Survey
Anne Fairbrother, Parametrix, Inc.
William Adams, Rio Tinto
William Wuerthele, Consultant
Brad Marden, Parliament Fisheries
Don Hayes, University of Louisiana

Steering Committee

Dave Grierson, UDNR/Forestry Fire and State Lands
Clay Perschon, UDNR/Division of Wildlife Resources
Karen Hamilton, U.S. Environmental Protection Agency, Region 8
Nathan Darnall, U.S. Fish and Wildlife Service
David L. Naftz, U.S. Geological Survey
Don Leonard, Utah Artemia Association
Jim Huizingh, Morton Salt
Kelly Payne, Kennecott Utah Copper

Richard Bay, Jordan Valley Water Conservancy District
Leland Myers, Central Davis Sewer District
Maunsel Pearce, Great Salt Lake Alliance
Robert W. Adler, University of Utah
Chris Montague, The Nature Conservancy of Utah
Richard West, West Side Associated Duck Clubs
Delane McGarvey
Richard Sprott, Utah Department of Environmental Quality
Walt Baker, Utah Division of Water Quality

Principal Investigators

John F. Cavitt, Weber State University
Michael Conover, Utah State University
Wayne Wurtsbaugh, Utah State University
Brad T. Marden, Parliament Fisheries, LLC
David L. Naftz, U.S. Geological Survey
William P. Johnson, University of Utah
Martin Grosell, University of Miami
Many students and field, office, and laboratory assistants
